#02

I have always known that the water and sewer rates charged by Carolina Water were extremely high to start with. Unfortunately, our subdivision has no choice and therefore has to pay these fees. This is truly a monopoly!!! I think that if the Public Service Commission would look into the rates of surrounding communities and towns, you will see that the rates are extremely lower. I certainly realize that there is a cost involved in supplying these services, however in the 22 years that I have resided at this location I have seen no improvements other than a sewer lift station emergency pump, which should have been installed when the system was installed. Carolina Water Does not even have to install the water and sewer lines in subdivisions. This is installed by the developer. The homeowner has to pay a tap fee to tie into the system, and of course a monthly fee.

Therefore based on the high price presently being charged by Carolina Water and the low water and sewer prices charged by surrounding communities and towns, I strongly object to this amount of increase. Maybe I would suggest that Carolina Water sell their interest to a company or municipality with lower rates, who can properly administer the system.

Carolina Water needs to look around at the economic situation in our country and its financial disparity and withdrawn their ridiculous request.
